

Test of Bayesian belief network and stakeholder involvement

Danmarks og Grønlands Geologiske Undersøgelse
Miljøministeriet
Københavns Energi
Københavns Kommune

Special issue

Editor: Hans Jørgen Henriksen

Drawing: Authors and Kristian Rasmussen

Cover and cover photos: Kristian Rasmussen and Per Rasmussen

Impression: 100

Date: July 2004

ISBN: 87-7871-139-8

Price: DKkr. 300.- inc. VAT

CONTENTS

CONTENTS	3
ACRONYMS	7
CHAPTER 0 Preamble	9
<i>Hans Jørgen Henriksen, GEUS</i>	9
Car start problem with a time delay: Precautionary groundwater protection	9
CHAPTER 1 Summary	13
<i>Hans Jørgen Henriksen, GEUS</i>	13
Introduction	13
Objectives for the Danish case study	14
Results of the Danish case study	15
Evaluation	17
Recommendations for guidelines	18
CHAPTER 2 Sammenfatning	19
<i>Hans Jørgen Henriksen, GEUS</i>	19
Introduktion	19
Formål	20
Resultater af det danske MERIT case studie	20
Evaluering	22
Anbefalinger til vejledning i brug af BBNs	23
CHAPTER 3 Introduction	25
<i>Hans Jørgen Henriksen, GEUS, Per Rasmussen, GEUS, Gyrite Brandt, CE and Dorthe von Bülow, CE</i>	25
3.1 Objectives	25
3.1.1 Decision support tool	26
3.1.2 Quantifiable water resource indicators	26
3.1.3 Framework for stakeholder participation	26
3.2 Terminology for public participation under the Water Framework Directive	27
3.2.1 Information, consultation and active involvement	27
3.2.2 Public participation in relation to the case study at Havelse wellfield	29
3.3 BBN Terminology	30
3.3.1 Definition of Bayesian belief networks	30
3.3.2 Using HUGIN for reasoning under uncertainty	31
3.3.3 Hypotheses to be tested in relation to BBNs	33
3.3.4 Impacts from individual, group and structure variables	34
3.4 Concept and approaches applied for the Danish case study	35
3.4.1 Case study area: Havelse wellfield catchment	35
3.5 Existing practices at Copenhagen Energy	37

3.5.1 Regional abstraction.....	38
3.5.2 Local abstraction	38
3.5.3 Concrete groundwater protection	38
3.5.4 Abstraction licenses	39
3.5.5 The test area: Havelse wellfield and catchment area	39
3.5.6 Abstraction licence for the Havelse wellfield	40
3.5.7 Stakeholder involvement	40
3.6 Introduction to BBN construction protocol	40
3.7 References.....	46
CHAPTER 4 Description of the wider water resources management in Denmark	49
<i>Lisbeth Flindt Jørgensen (GEUS) and Gyrite Brandt (CE)</i>	49
4.1 Danish drinking water production.....	49
4.2 The overall legal and administrative framework	49
4.3 Active groundwater protection in Denmark	52
4.4 After the implementation of the Water Framework Directive	53
4.5 Stakeholder involvement.....	55
4.6 References.....	55
CHAPTER 5 Stakeholder involvement	57
<i>Per Rasmussen, GEUS</i>	57
5.1 Identification of stakeholders.....	57
5.2 Stakeholder involvement process	61
5.2.1 The professional stakeholder group	61
5.2.2 The citizens stakeholder group.....	62
5.2.3 Stakeholders' evaluation of the involvement process.....	64
Annex 1. Stakeholder questionnaire and input: Distribution of tasks among stakeholders: roles in the context of groundwater protection.	66
Annex 2. Stakeholder questionnaire and input: What would be the consequences of different groundwater protection measures?	68
5.3 Discussion.....	72
CHAPTER 6 Development of Bayesian belief networks	73
<i>Hans Jørgen Henriksen, GEUS</i>	73
6.1 Background.....	73
6.2 What is a BBN?.....	76
6.3 An example of a BBN for farming contracts	77
6.4 Methodology of BBN development.....	80
6.4.1 Informing stakeholders and general public about precautionary groundwater protection issues and BBN development.....	80
6.4.2 Construction of BBNs with stakeholder involvement (Steps 1 – 3).....	85
6.4.3 Quantitative BBN construction, data collection and definition of states and CPTs (Steps 4-6).....	90
6.4.4 Collection of feedback from stakeholders (Step 7)	93
6.5 BBN for groundwater protection	96
6.5.1 Description of the directed acyclic graph for voluntary farming contracts.....	97
6.5.2 Description of conditional probability tables for BBN for farming contracts	99

6.5.3 Using the BBN model in farming contract decision-making.....	105
6.5.4 Use of structural learning for assessment of sandy soils vulnerable to pesticide leaching.....	110
6.6 A BBN for flooding.....	120
6.7 Validation of BBNs	127
6.7.1 Validation of the BBN for farming contracts.....	127
6.7.1 Validation of BBN for flooding.....	127
6.8 References.....	131
CHAPTER 7 Data collection for groundwater protection management	133
<i>Per Nyegaard, GEUS</i>	133
7.1 Basic hydrogeological data	133
7.1.1 Pesticide mapping at field level	139
7.1.2 Sampling of individual (shallow wells) and Havelse creek for pesticides.....	140
7.2 Land use data and restrictions	142
7.3 References.....	150
CHAPTER 8 Main conclusions and perspectives in relation to WFD	151
<i>Hans Jørgen Henriksen, GEUS, Per Rasmussen, GEUS, Gyrite Brandt, CE and Dorthe von Bülow, CE</i>	151
8.1 Stakeholder engagement.....	151
8.2 Use of BBN	153
8.3 Problems to look out for	158
8.4 Future research needs.....	159
8.5 MERIT concept compared to traditional approaches	160
8.6 Main ongoing CE activities related to the Water Framework Directive.....	160
8.7 References.....	161
CHAPTER 9 Comments from the Havelse Creek Citizens' Group on draft GEUS report entitled "Test of Bayesian belief network and stakeholder involvement"	163
<i>Hans Jørgen Henriksen, GEUS</i>	163
9.1 Re Chapter 0: Preamble	163
9.2 Re Chapters 1 and 2.....	163
9.3 Re Chapter 3: Introduction.....	164
9.4 Re Chapter 4: Description of the wider water resources management in Denmark.....	166
9.5 Re Chapter 5: Stakeholder involvement.....	167
9.6 Re Chapter 6: Development of Bayesian belief networks	168
9.7 Re Chapter 7: Data collection for groundwater protection management.....	171
9.8 Re Chapter 8: Main conclusions and perspectives in relation to WFD.....	172
9.9 Re Appendix 1: Economic loss on conversion to pesticide-free crop cultivation in the Havelse abstraction area	173
9.10 Re Appendix 2: Economic analysis of abstraction strategies for groundwater in the Havelse Creek catchment area.....	175
9.11 Re Appendix 3: When citizens are to be involved: From water in the basement to Bayesian networks.....	176
9.12 Re Appendix 4: Contribution from the Havelse wellfield citizens' group.....	176
9.13 References.....	177

- Appendix 1 Driftsøkonomiske tab ved pesticidfri dyrkning af landbrugsarealer ved Havelse kildeplads. *Svend Rasmussen*, KVL (in Danish)
- Appendix 2 Samfundsøkonomisk analyse af indvindingsstrategier for grundvand i oplandet til Havelse å. *Jesper S. Schou*, DMU (in Danish)
- Appendix 3 Involving citizens: From water in the basement to Bayesian networks. *Jan Poulsen*, Agenda 21 Center, Frederikssund
- Appendix 4 MERIT workshop 3 March 2004. *Comments from the Havelse wellfield citizens' group.*
