

Fig. 6. Key palynostratigraphic events in Cenozoic strata of the Labrador–Baffin Seaway and adjacent areas. The events from the seaway are exclusively 'Last Occurrences' (LO), whereas the events from the Nuussuaq Basin and Quilleq-1 also include significant 'First Occurrences' (FO). Systematic palynology of the assemblages, including new taxa, is presented herein; timescale (Ma) from Gradstein et al. (2012). E: Early. M: Middle. L: Late.
