

FRISBEE Newsletter #13

- News about Oil and Gas Data from Denmark

Newly released well data packages (offshore, Danish North Sea)

Well data package from the offshore appraisal and exploration well Bo-4X have now been released. The well was drilled in 2013 in the Danish North Sea. Please see map for location: [Newsletter-13 map 2019 08.pdf](#)

- [BO-4X](#) (Available from 01-07-2019. Price using Frisbee – 26,900 DKK)
For details (Well Data Summary Sheet): [BO-4X](#)

About: BO-4X [Source: DEA Press release / 05-11-2013]:

As operator for DUC in the Sole Concession of 8 July 1962 Mærsk Oil has drilled the Bo-4X (5504/7-16) exploration well in the western part of the Danish North Sea. The well did not discover oil or gas.

Bo-4X was drilled as a vertical well with Upper Cretaceous Hidra chalk as target and reached its total depth in Lower Cretaceous clay stone at 2337 metres below mean sea level. Cores were taken and an extensive logging programme was carried out.

Bo-4X was spudded on 5 September 2013 with the jack-up rig ENSCO 72 at the position 55° 46' 59" N; 04° 33' 20" E (UTM zone 31; 6 183 158.38 m N; 597 567.46 m E), where the water depth is 44 metres.

The well is plugged and abandoned. Link to source: [DEA press release](#)

- [BOJE-2C](#) (Available from 21-06-2019. Price using Frisbee (Full package – all segments) – DKK 50,650).
If the well data package has been purchased previously and only newly, added reports and data from the segment Boje-2C is requested please contact info-data@geus.dk

About: BOJE-2C

Due to change in spud classification, the data from the Boje-2C segment have now been included in the well data package from the well: BOJE-2/2A/2B/2C. A total of 13 reports, 66 well logs and 26 digital logs (incl. the GEUS products: Merged log data and QC - complete digital well logs, Version 1.0).

Released reports added to Frisbee

A report received after the release of the main part of data from a well will be released and added to Frisbee web shop immediately after release. In case you have already purchased the 'well data package' earlier – Please contact GEUS to receive a discount code prior to purchase of the newly released report(s).

The following reports have been added to Frisbee (since Newsletter #12, January 2019):

| Well | Title | GEUS File | Company |
|------|-------|-----------|---------|
| ./. | ./. | ./. | ./. |

Free download - Frisbee web shop

- Standardised formation tops for all Danish exploration wells are available for free download via '[Data Collections](#)' tab in the Frisbee Webshop.
- Well completion reports
- Well deviation data
- 3D surveys acquisition reports

All prices are valid if data is being purchased using GEUS' web shop Frisbee.

All prices are excl. VAT and are calculated for one company. Group discounts are available.
