

FRISBEE

- How to buy well data from GEUS

Purchase well data using GEUS' eCommerce system

From our new web-site you can search for, choose, buy and download released well data from appraisal and exploration wells in Denmark.

When buying data through FRISBEE, as opposed to contacting GEUS Subsurface Archive directly, you obtain a discount.

Payable by credit card or invoice.

Well data is sold as "Well data packages" for each well separately. If available, a package consists of:

- Scanned reports
- Scanned logs
- Original well log data
- Merged log data
- Scanned core photos
- Deviation/Position data
- VSP data
- Mud logging data
- Technical and administrative data
- Documentation files

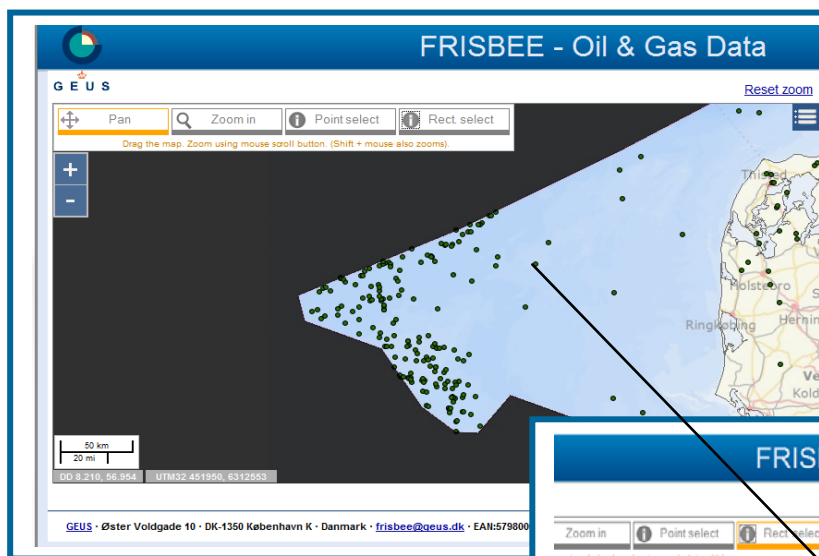

Single items are available without discount.

Please note: 'Completion reports' and 'Deviation data' are free.

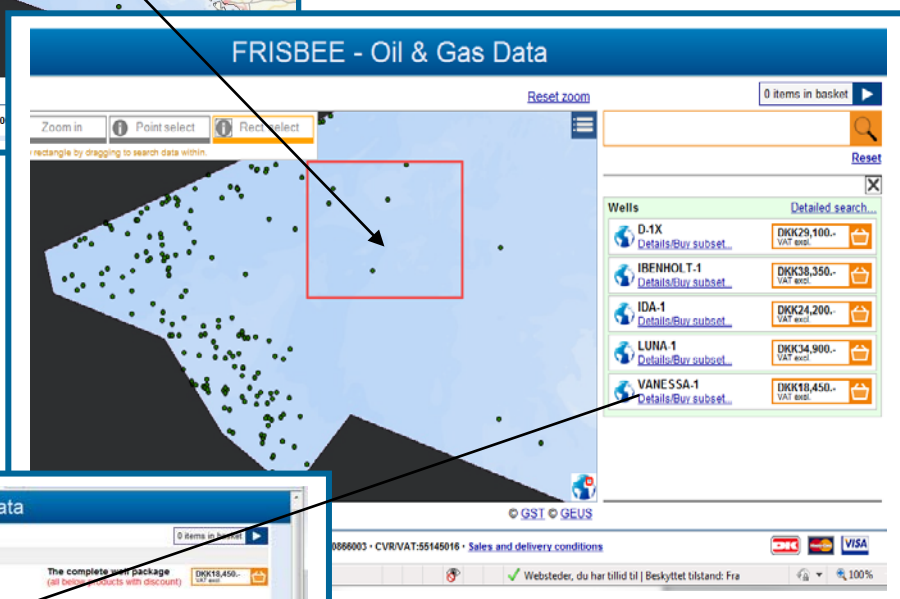

Visit us at: <https://frisbee.geus.dk>

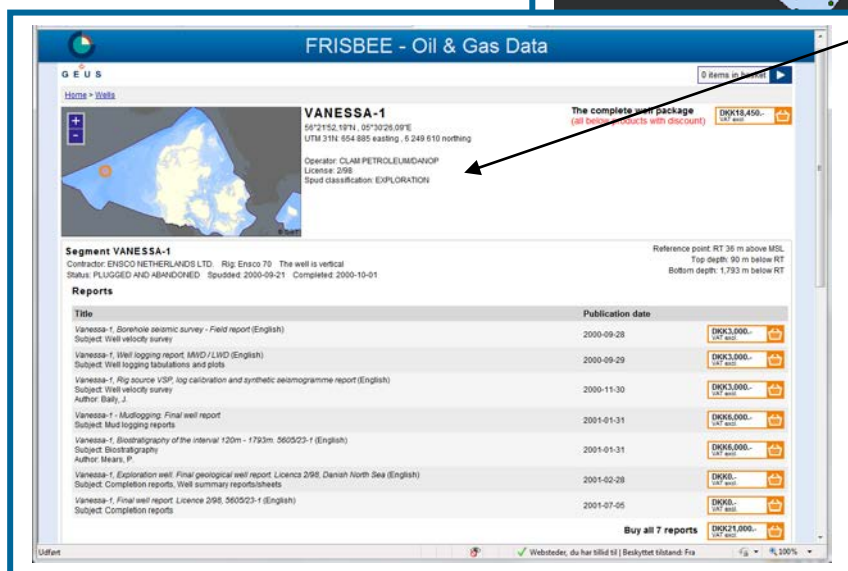

Visit us at <https://frisbee.geus.dk>

Zoom in on an area and select the well(s) of interest

See details about the data

Select and buy the wanted data

Please note:

The current prices may change, if additional data are released and included in the 'Well data package'.
